**TITLE : DIGITAL STILL CAMERA MOUNTED
WITH DISPLAY PANEL**

ABSTRACT : PROBLEM TO BE SOLVED: To adjust the quality of reproduced images on the display panel of a digital still camera.

SOLUTION: The digital camera mounting the display panel 22 for displaying reproduced images of photographing images comprises a means for displaying a color, based on a standard color signal on the display panel 22 by generating the standard color signal, a printing chart 63 where a standard color is printed, and a panel-adjusting means for manually adjusting the display of the display panel 22, so that the color that is displayed on the display panel 22 matches the standard color of the print chart 63. Further, an image quality adjusting means for adjusting the quality of the reproduced image is provided, when the reproduced image is displayed on the display panel 22, thus displaying reproduced images on the display panel 22, where the standard color is displayed appropriately and adjusting the quality of the reproduced images.
